

Radek Kučera

Diagnostic algorithm of Prostate Cancer

PRECISION
DIAGNOSTICS
EUROPE 2021

26th May, 2021

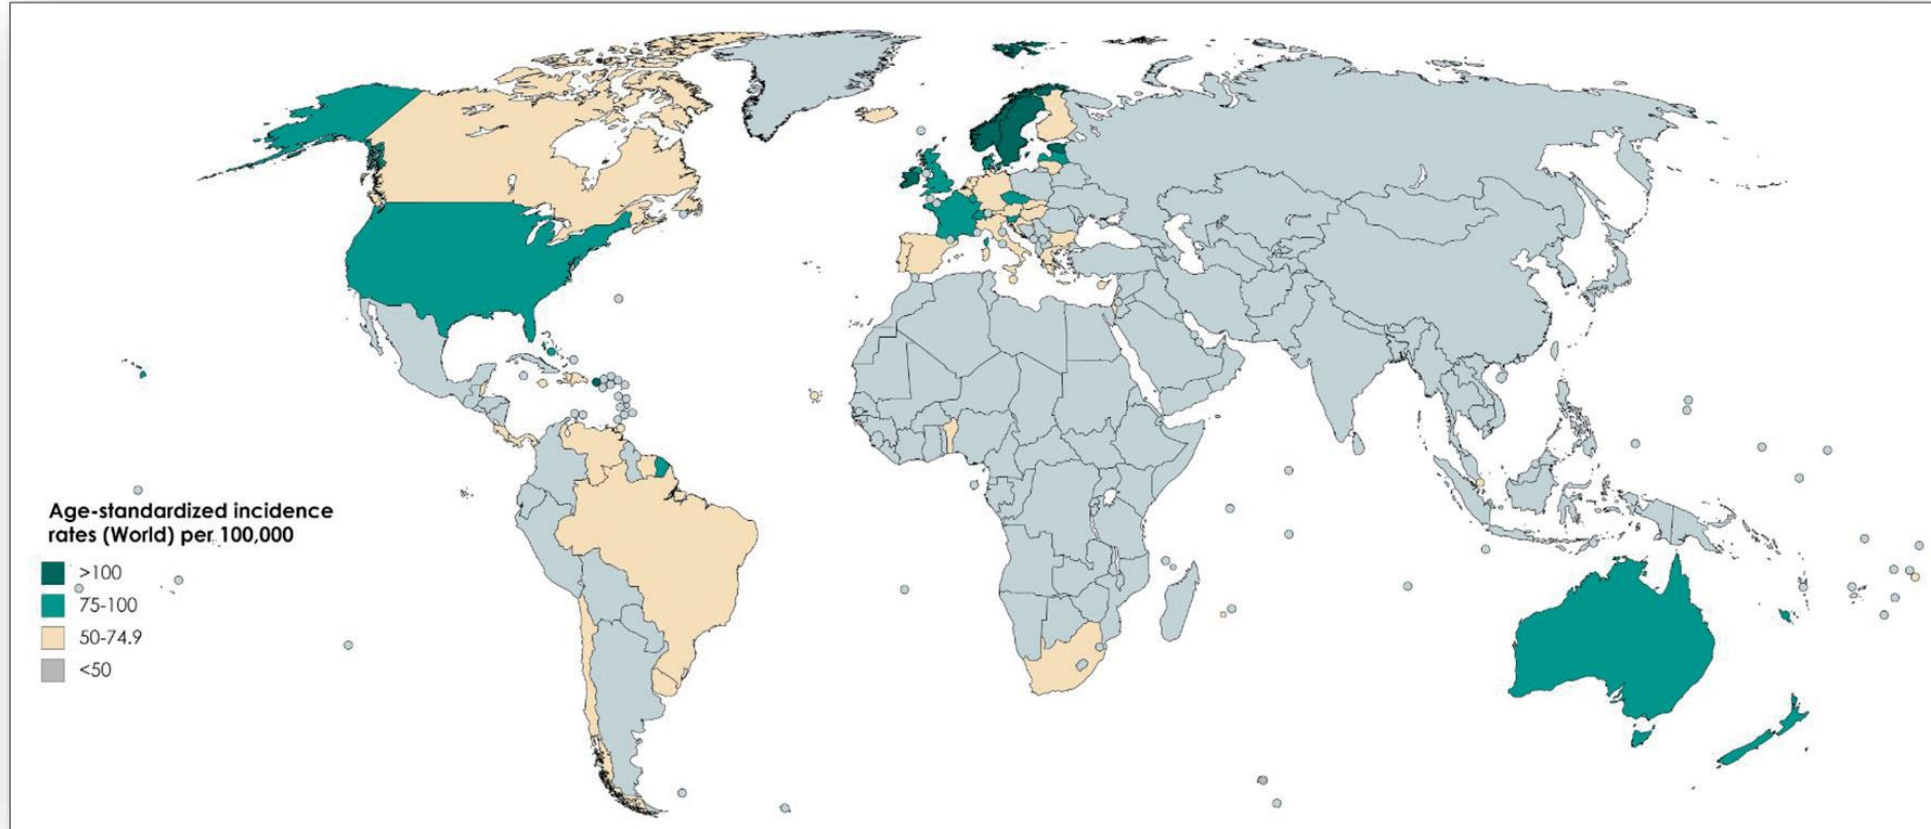

Schedule of the presentation

- **Epidemiology of prostate cancer (PCa)**
- **Experience with PCa diagnosis**
- **Diagnostic algorithm in the University Hospital in Pilsen**
- **Conclusions**

PCa epidemiology

Estimated Prostate Cancer Incidence Worldwide in 2018

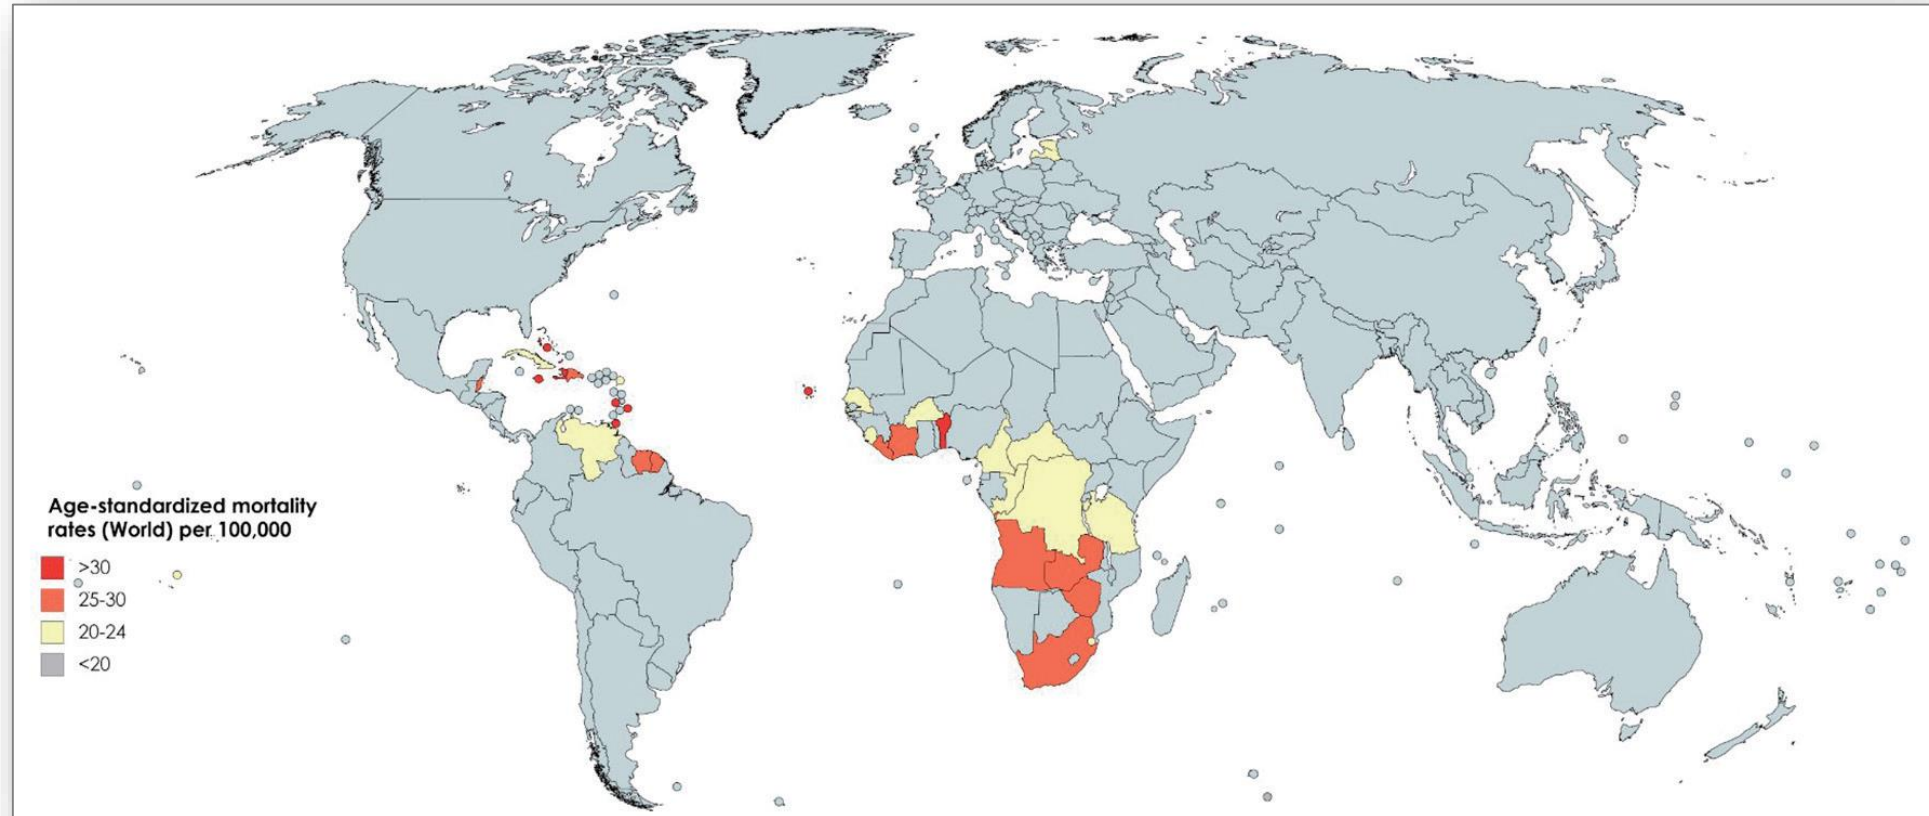

Rawla P. Epidemiology of Prostate Cancer. World J Oncol. 2019 Apr;10(2):63-89. doi: 10.14740/wjon1191.

PCa epidemiology

Estimated Prostate Cancer Mortality Worldwide in 2018

Rawla P. Epidemiology of Prostate Cancer. World J Oncol. 2019 Apr;10(2):63-89. doi: 10.14740/wjon1191.

Main current clinical question

What is the aggressiveness of the tumour?

Active surveillance vs. surgery

Active surveillance - benefits for patient

- **Surgery burden**
- **Anesthesia**
- **Incontinence**
- **Erectile dysfunction**

Current diagnostic tools

- **Biopsy**

- Gleason Score

- **Imaging methods**

- Ultrasound (US), magnetic resonance (MRI), positron emission tomography (PET)/MRI

- **Prostate specific antigen (PSA) panel**

- **total PSA (tPSA)**
- **free PSA (fPSA)**
- **[-2]proPSA**
- **%freePSA** $\%freePSA = (fPSA/tPSA) * 100$
- **Prostate Health Index** $PHI = ([-2]proPSA/fPSA) * \sqrt{tPSA}$

Biopsy, histology

Gleason Score

- In the 60's a US pathologist **Donald Gleason**.
- **The cells are scored on a scale of 1 to 5.**
- The pathologist looking at the biopsy sample will assign one Gleason grade to the most predominant pattern in the biopsy and a second Gleason grade to the second most predominant pattern.
- The sum of these 2 grades is called the **Gleason Score**.

• **GS=6 vs GS>6 (7-10)**

Current evaluation

- In 2016 International Society of Urological Pathology (ISUP) revised the grading system in PCa.

Gleason Score	ISUP Grade
6	1
7 (3+4)	2
7 (4+3)	3
8	4
9, 10	5

Prostate specific antigen (PSA) in PCa diagnostics

- **PSA**

- free
- bound to alpha-1-antichymotrypsin
- bound to alpha-2-macroglobulin - loss of immunoreactivity

- PSA is specific for prostate tissue but not for PCa

- **Increased levels of PSA**

- PCa
- benign prostatic hyperplasia
- acute and chronic prostatitis
- after ejaculation, mechanical prostate massage

PSA panel FN Pilsen - reference values

tPSA ($\mu\text{g/l}$)

till 39 years	0 - 2.0
40-49 years	0 - 2.5
50-59 years	0 - 3.5
60-69 years	0 - 4.5
above 70 years	0 - 6.5

%fPSA

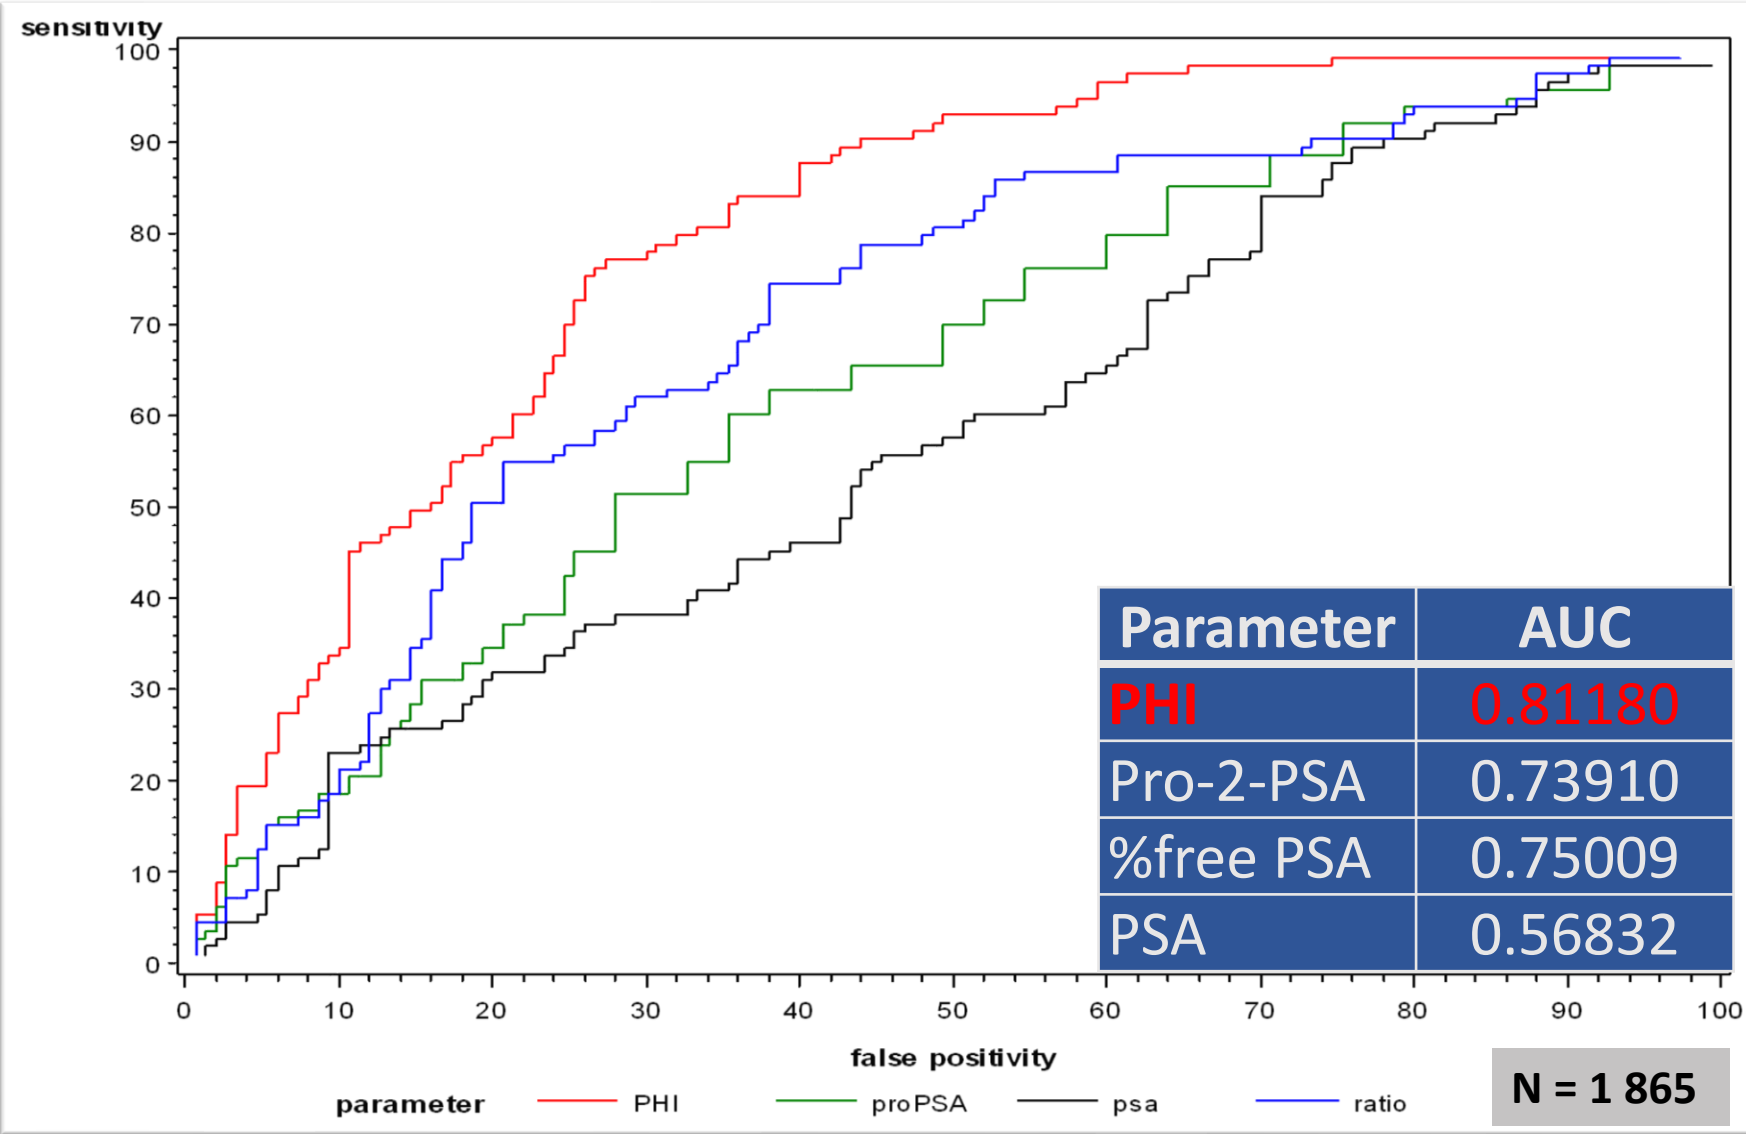

above 25 %	benign disease
15-25 %	gray zone
0-15 %	malignant tumour

PHI

0-30	benign disease
30-40	gray zone
above 40	malignant tumour

ROC curves - PSA markers vs. Gleason Score

PHI in clinical practice

Dolejšova O, Kucera R, Fuchsova R, Topolcan O, Svobodova H, Hes O, Eret V, Pecen L, Hora M. [Preoperative prostate health index predicts adverse pathology and Gleason score upgrading after radical prostatectomy for prostate cancer.](#) **BMC Urol.** 2020 Sep 7;20(1):144.

ROC - biopsy

Gleason Score (GS6 vs GS>6)

ROC - histology after radical prostatectomy (RAPE) Gleason Score (GS6 vs GS>6)

3 casuistics

University Hospital in Pilsen 2012 – 2020

Patient 1 (age 77)

01/2014 – 03/2020

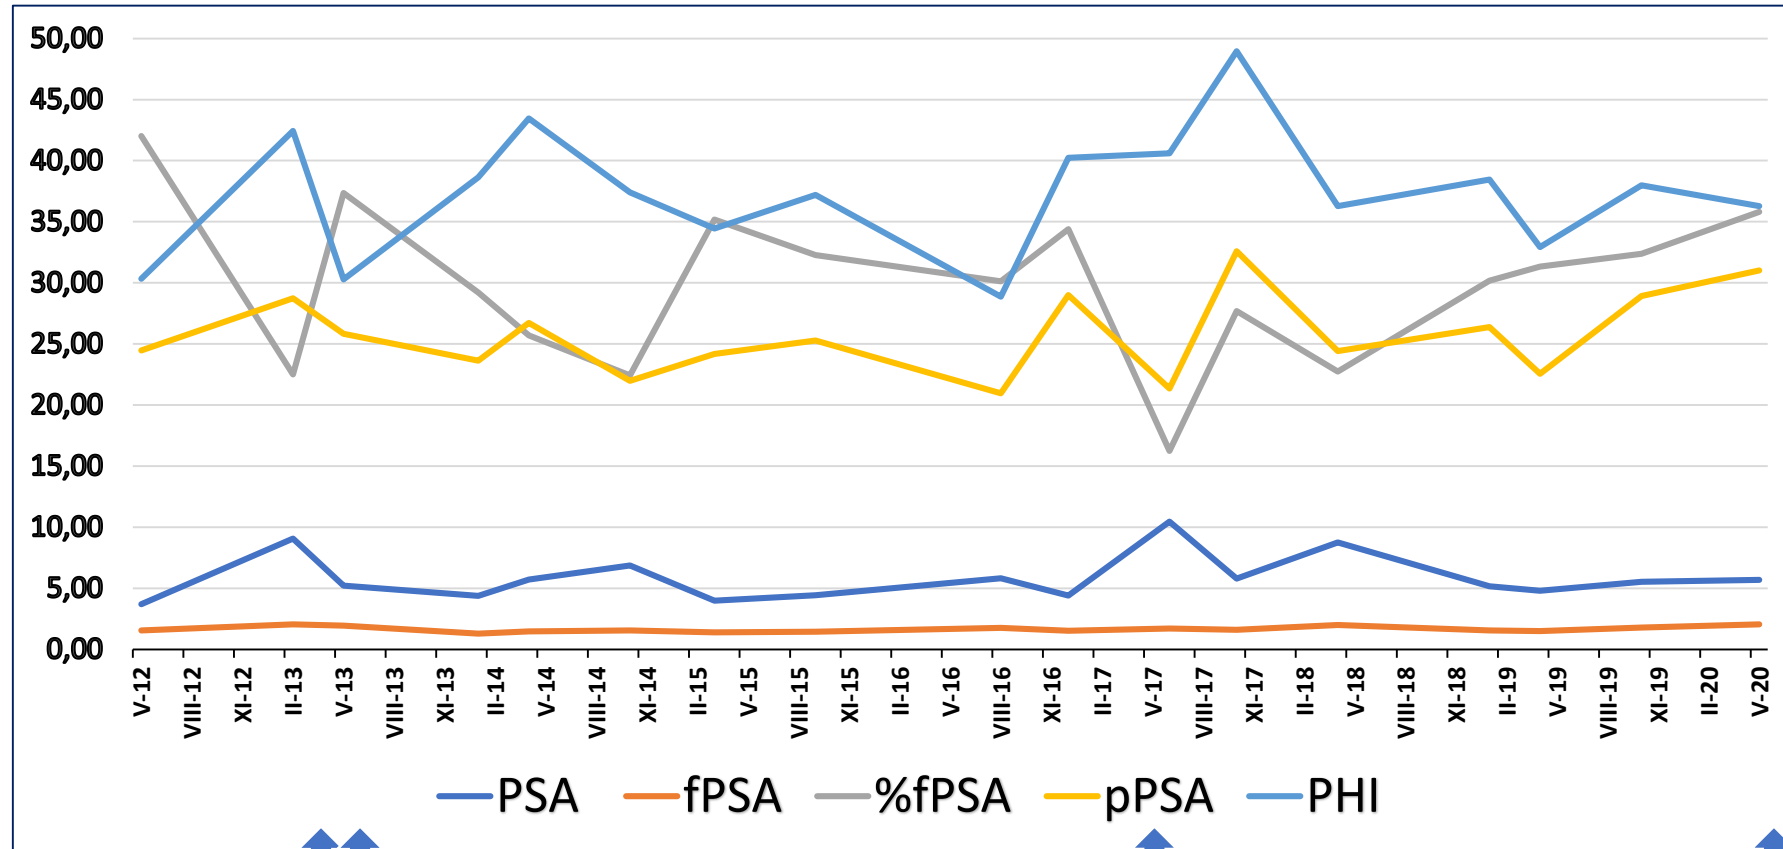

MRI
PIRADS 5

Biopsy
GS6 (3+3)
ISUP 1

Patient 2 (age 77)

05/2012 – 05/2020

MRI
adenomyomatous
hyperplasia

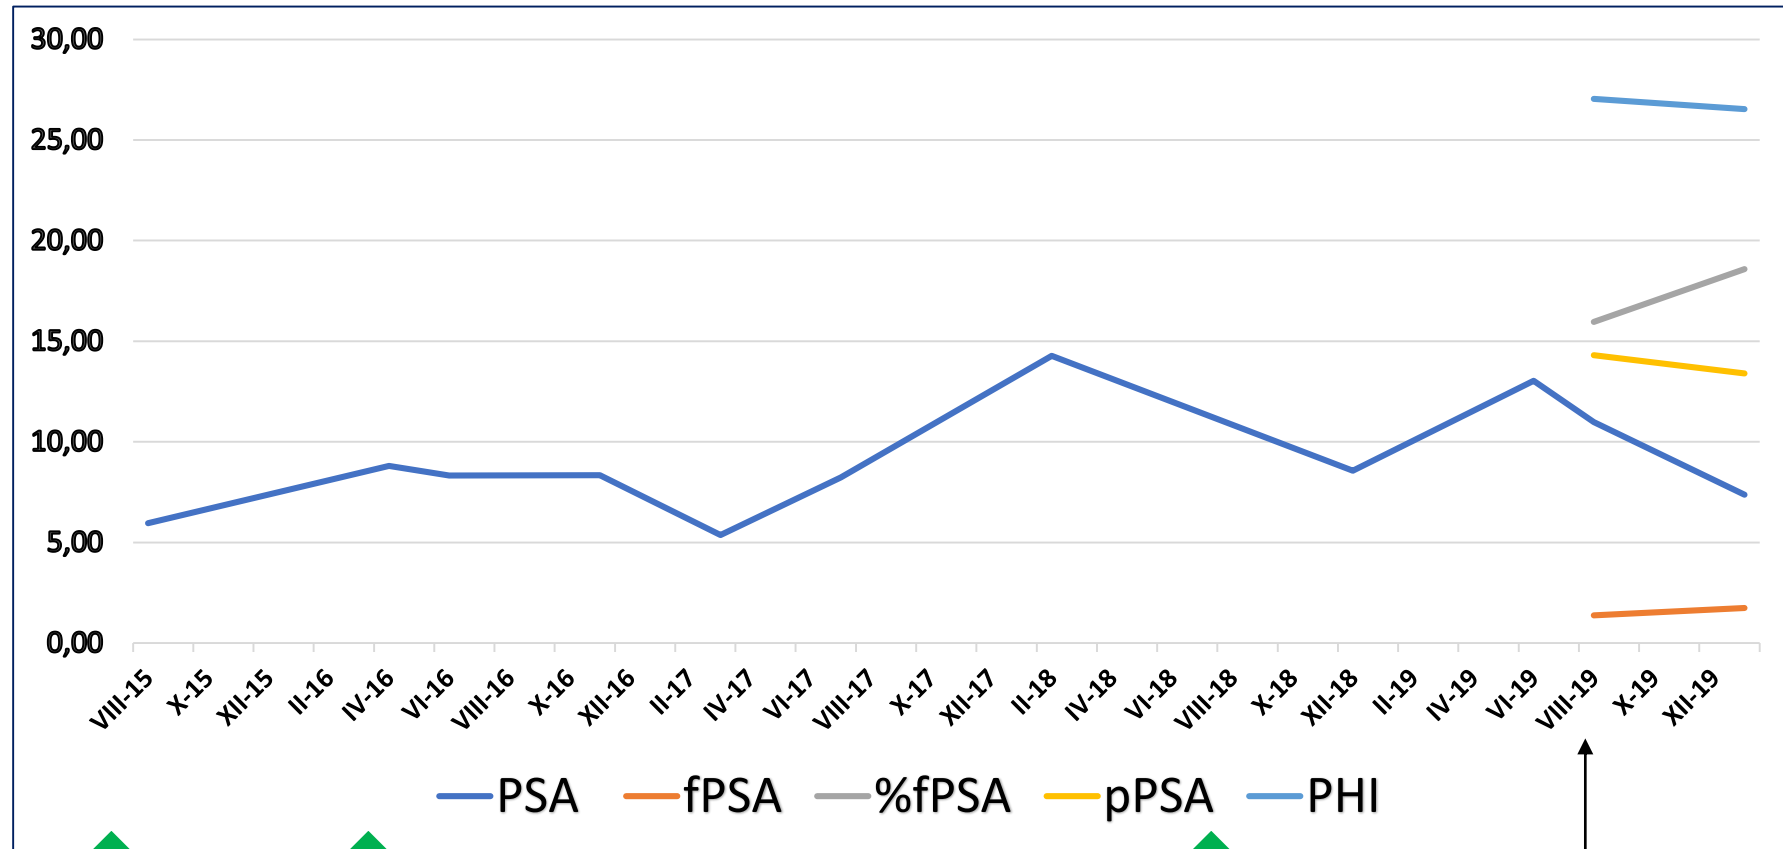

PET/CT ¹⁸FCH
adenomyomatous
hyperplasia

MRI
benign hyperplasia
PIRADS 2

MRI
adenomyomatous
hyperplasia PIRADS 2

Patient 3 (age 71) 08/2012 – 01/2020

Diagnostic algorithm of Prostate Cancer

- patient stratification
- comprehensive staging
- aggressiveness assessment

Sedláčková H, Dolejšová O, Hora M, Ferda J, Hes O, Topolčan O, Fuchsová R, Kučera R. Prostate Cancer Diagnostic Algorithm as a "Road Map" from the First Stratification of the Patient to the Final Treatment Decision. *Life* (Basel). **2021** Apr 7;11(4):324.

The diagnostic algorithm for suspected prostate cancer at University Hospital in Pilsen

^{**)} ⁶⁸Ga-PSMA-11 PET/MRI is currently preferred in the Hospital, when PSMA PET is not available ¹⁸F-choline PET/MRI is recommended

Conclusions

- **1) Tumour aggressiveness and choice of the appropriate treatment**
- **2) Active surveillance**
- **3) The Diagnostic Algorithm reflects advances in**
 - ✓ PSA markers
 - ✓ Biopsy techniques
 - ✓ Imaging methods
